Description	
<p>Modify the site web to autodetect the current OS and put the corresponding package first. Put the rest in a section "other downloads" below (a collapsible section?).</p> <p>Add these two packages:</p> <ul style="list-style-type: none">• A tar.gz file containing the sources (the bash script to create it already exists in the 1.1 branch)• A .zip file containing a minimal installation-free Windows distribution. It doesn't contain the log viewer neither the password hasher.
